

## **Example of a one minute oral presentation of a poster or project**

Modified from an actual participant

*Assalamo-alaykum. My name is Ilhaam, and I am a sixth grader from the Pittsburgh Jamaat. The title of my poster is "A neighbor's tick bite and the risk of Lyme." The focus of my poster is on a true story of how my family and I figured out whether my next-door neighbor's tick bite would lead to Lyme Disease. The poster is inspired by a verse of the Holy Quran indicating how the even smallest creations of God, such as a tick, can do wondrous things.*

*The aims of my poster were to examine why a small tick bite can be a serious issue, to understand how Lyme Disease is transmitted from a tick, and to assess the risk of Lyme Disease after a tick bite. By looking under the microscope, I was able to conclude that my neighbor's tick bite could indeed transmit Lyme Disease. Jazakallah.*
